

Fully recessed extruded aluminum housing that allows the designer to seamlessly combine linear fluorescent ambient lighting with accent and task lighting. A variety of aperture sizes accommodates a large range of sources. Available in flanged and flangeless trims the system can integrate with most ceiling systems. Fluorescent section is available with shielding options that include louvers and aperture lenses. Accent lighting and down lighting sections are available with a variety of trims, and optical accessories.

Useful in applications such as commercial, retail and residential environments; The system allows the designer to create an ordered unified solution that addresses multiple lighting requirements.
